

“ Our vision:  
to provide trusted multilingual communication ”

## AUDIOVISUAL

### MULTILINGUAL AUDIO SERVICES

These days, it takes more than one-dimensional communication to engage your audience. Whether you're trying to penetrate new markets, offer eLearning or enable touch-screen service, our audiovisual solutions can help you improve visibility, increase learning retention and strengthen business operations.

With a collective of experienced, native-speaking voice talents, voice directors and sound engineers, we're able to produce end-to-end, high-quality audio and video programs—in more than 100 languages and dialects. Our voice-over and narration services focus on preserving the integrity of your original script. To make sure we're successful, we cast the best talent and then leverage our range of services, including translation, cultural adaptation, linguistic coaching, editing, mixing and playback. The fact we can do this all in house makes us stand out among multilingual companies.

### SUBTITLING SERVICES

Effective subtitling requires more than accurate translation. It also demands perfect timing. Bringing the two together is one of our strengths. Our subtitling service partners are not only refined linguists, they are skilled writers who know how to use their craft to produce time-fitted translations with tone, register and content accuracy.
